EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

(A) Non-elected claims 23-60 have been cancelled (Applicant elected, **without** traverse, claims 1-22 for prosecution; note the restriction requirement set forth below).

Restriction to one of the following inventions is required under 35 USC § 121:

I. Claims 1-22, drawn to a process of making poly(trimethylene terephthalate) yarn, classified in class 264, subclass 103.

II. Claims 23-52, drawn to poly(trimethylene terephthalate) yarn, classified in class 428, subclass 364.

III. Claims 53-60, drawn to a process of calculating dry warm shrinkage, classified in class 73, subclass 160.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of

Art Unit: 1732

the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as a process including the steps of extruding a film, quenching the film, longitudinally slitting the film to form filaments, passing the filaments to a heated godet to form a yarn and cooling the yarn.

Inventions I-III and II-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions are unrelated principally because the process of Group III cannot make the product of Group II and the process of Group III is directed to measuring and calculating, not manufacturing a particular product (as is the process of Group I).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination as indicated is proper.

During a telephone conversation with Mark D. Kuller (by Examiner Newton Edwards, GAU 1774), applicant's representative, on 18 May 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-22. Affirmation of this election must be made by applicant in replying to this Office action. Claims 23-60 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. The following is an examiner's statement of reasons for allowance: None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a process of making poly(trimethylene terephthalate) yarn including the step of quenching extruded poly(trimethyelene terephthalate) to form a threadline of solid filaments wherein the filaments have a tension at 130°C greater than about 0.02 g/d (as set forth in independent claim 1).

Art Unit: 1732

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
